Building on Urban Fundamentals

SUSTAINABLE FORM
THE WHARF / PLACEMAKING

The Wharf, also designed by a world-class team of architects, planners and engineers led by KPF, is located at the confluence of four north-south streets and a north-south transit corridor. The approach is a place-based strategy, reimagining the site as a mixed-use complex that integrates pedestrian and vehicular traffic, creating a vibrant and dynamic place. The design features mixed-use development, retail, restaurants, offices, residential, and public spaces, all connected by a network of pedestrian and vehicular arteries. The Wharf serves as a gateway to the waterfront, offering a rich and diverse experience for all visitors.
Reinventing Business at the Waterfront

OFFICE
Visitors Welcome.

HOTELS
Water is Life.

RESIDENCES
Connectivity. Efficiency. Speed.

SUSTAINABLE TRANSPORTATION
Healthy. Clean. Resilient

ENVIRONMENTAL SUSTAINABILITY
CULTURAL SUSTAINABILITY

Authenticity. History. Creativity.
