Bulletin

April 2010

Washington Building Congress is a nonprofit association made up of professionals from a variety of disciplines, all with an active interest or involvement in the Washington Metropolitan Area's real estate, design, and construction community. The organization was established in 1937 to represent the collective interests of its members by providing education and networking opportunities and by promoting the advancement of the building industry. For additional information about membership, joining a committee or the WBC Bulletin, call (202) 293-5922 or visit us on the web at www.wbcnet.org.

Chairman's Letter

Dear Members and Colleagues:

I am sure you will enjoy this special edition of the WBC *Bulletin* featuring the 54th Craftsmanship Awards program, "Standard of Excellence for a New Beginning". This year we recognized 78 outstanding award winning entries out of an all time record 314 nominations, along with our three Star Award winners representing the overall best of all entries. We also inducted the third class of craftsmen into the *Craftsman Hall of Fame*. Over 8,600 deserving men and women have won WBC Craftsmanship Awards over the last 54 years. This year alone, 350 craftsmen were individually recognized! Thank you to everyone who supported this important industry event and to the 1,200 attendees who turned out to honor our award winners at the March banquet.

A very special thank you goes to the 2010 Craftsmanship Awards Committee, Chairman Mike Shoemaker (*IBEW Local 26*), Vice-Chair Allen Slaughter (Dynalectric Company) and Board liaison Lynne Coville (Boston Properties) for putting together another highly successful event. I would also like to extend thanks to all of the volunteers who helped make this program a success, along with WBC staff members Steve Kenton and Rita Reis. Thank you as well to the craftsmen, nominators, judges, award winners, banquet attendees, sponsors and advertisers. Mike and Allen, you did a truly outstanding job as co-emcees of the awards presentation. The WBC Craftsmanship Awards program continues to grow in stature and the 2010 event once again raised the bar.

The Community Services Committee held the 4th annual WBC Rebuilding Together workday in Falls Church on Saturday, April 24. The outpouring of support for this worthy initiative was once again above and beyond our expectations. The July/August *Bulletin* will highlight all of the individuals and companies involved with the project and feature some great action photos from the workday. Thanks go to all of our wonderful volunteers, along with the Community Services Committee, Chair Anne Marie Tombros (Vango, LLC), Vice-Chair Winona Leaman (Greenman-Pederson), and House Captain Tim Bakos (Lessard Group).

The Hammerheads held another successful networking event at *Buffalo Billiards* on April 14. This followed their February post-blizzard get together at *Lucky Strike Lanes*. Coming up in May the group will be hosting an introduction to social networking seminar for all WBC members. Hammerheads event are open to members and employees under 40 years old. Please encourage everyone in your company under 40 to get active and to attend the next WBC event. Thank you to the Hammerheads Committee, Chair Lisa Walker (BE&K Building Group) and Vice-Chair Mike Baruccheri (Tishman Construction Corporation), for getting the new generation of industry leaders involved in the association.

Please mark your calendars now for the 73rd annual WBC Golf Outing coming up on Monday, June 14 at Lansdowne and Belmont golf clubs. We would appreciate your consideration of the great sponsorship opportunities available for this premiere industry event. The WBC golf outing provides an excellent way to showcase your business, entertain clients and reward employees. Sponsorship materials will be released later this month. If you are not a player, please plan to join us for the awards reception at Lansdowne. The 2010 Golf Outing Committee is being headed up by Co-Chairs George Domurot (Clark Construction Group) and John Hardy (Capital Lighting & Supply), along with Board liaison John Barron (Foulger-Pratt Contracting).

I look forward to seeing you at an upcoming WBC program or event. Thank you for your active participation and ongoing support of our great association!

Best regards,

Jonathan Kurtis
WBC Chairman of the Board

Special Thanks to Our
2010 Corporate Sponsor

FOULGER-PRATT

**Design-Build,
Preconstruction Services,
Construction Management,
General Contractor**

Knowing you've been around over 100 years is impressive to some clients. Knowing what you can build for them in the next eighteen months impresses them more.

Manhattan Construction has completed the last 60 projects on time and within budget. Every project gets our total attention from day one to completion.

MANHATTANCONSTRUCTION.COM

Proctor Named President of E.C. Ernst

WBC member E.C. Ernst, Inc. announced that **William "Bill" Proctor** has joined the company as President/General Manager.

Proctor was formerly the owner of Proctor Electric, Inc., a company he built into one of the area's largest electrical contractors before selling to their current management.

Mullins Elected to CBN-MC Board of Directors

John Mullins

John K. Mullins, CPA, audit manager at WBC member Councillor, Buchanan & Mitchell, P.C., CPAs was elected to the Board of Directors of the Catholic Business

Network of Montgomery County (CBN-MC), Maryland.

"We always encourage our staff's involvement in community activities and are very pleased with John's election to the CBN-MC Board," says S. Vincent Crescenzi, CPA, CVA, CFE, President and Managing Partner of CBM.

"I am honored to be selected to serve such a worthwhile organization, and I look forward to contributing to CBN's continued success," stated Mr. Mullins.

Mullins is the Vice Chairman of the Loyola Retreat House and serves on the audit committee of the Capital Area Food Bank. In addition, he is a member of the Greater Washington Society of Certified Public Accountants.

Hankins and Anderson Announce New Employee

WBC member Hankins and Anderson, Inc. announced that **Adam Randall** has joined the firm's Business Operations Department in its Glen Allen Office as an administrative assistant. Randall was formerly with the Virginia National

Guard in Afghanistan as an Administrative Clerk and CPOF Operator.

Floyd To Lead Business Development Efforts for Mid-Atlantic Region (Photo)

Steve Floyd

The BE&K Building Group, a WBC member, welcomes **Steve Floyd** as Director of Business Development for the company's Washington office in Vienna, VA. In this role, he will manage sales

leads while developing the existing and new client base.

With a career history spanning more than 25 years, Floyd has an extensive background in commercial construction. He has in-depth experience in both project management and field supervision, having directed construction activities for 6 million square feet of commercial space — office and retail buildings, tilt-up warehouses, precast parking garages and tenant fit-outs.

Floyd comes to the BE&K Building Group with an impressive track record with several prominent general contractors in the Washington metropolitan area. He was an integral part of a very successful team that grew one local office from \$5 million to over \$100 million annually in over a 15 year period. Most recently, he ran his own business, serving as a construction management consultant to owners, contractors, architects and engineers.

Floyd earned his Bachelor of Science in Civil Engineering from the University of Maryland.

Centennial Donates Bicycles to Children from the Boys & Girls Club

Eighteen boys and girls experienced the thrill of receiving their first bikes last week, thanks to a donation from WBC member Centennial Contractors Enterprises.

Centennial employees with some proud new bicycle owners.

The donation was part of a team building activity during the contractor's annual Leadership Conference, which was held in Warrenton, VA this year. David Sturdevant, director of training at Centennial, organized the activity by partnering with Repario which facilitates experiential learning seminars. The activity was tied to the Conference's theme: "What Matters Most."

Ninety of Centennial's managers and directors split into 18 teams and were then given 25 minutes to assemble a bicycle. Unsure if this was a competition for speed, accuracy or problem solving, the teams quickly got down to the business of building the bicycles.

Minutes into the work, facilitators informed the teams that the bicycles were a donation to the local Warrenton Boys & Girls Club and read letters from a few of the children on what a bike would mean to them. Most of these

children had never owned their own bicycle. With this knowledge, the teams quickly switched their mindsets, slowing their pace and checking for accuracy.

After completely building the bicycles, the teams were hit with another surprise; the boys and girls receiving the bikes were actually in the building, ready to receive their new bikes. The kids streamed into the room abuzz with excitement. The kids examined their new bikes and talked with their Centennial teams. Centennial managers were hit with the moment, shedding a few tears of joy and beaming with excitement for providing such a memorable moment.

On the move...

Effective April 1, 2010, **E.C. Ernst, Inc.** will have a new address: 132 Log Canoe Circle, Stevensville, MD 21666, Phone: 410-643-9090 / 301-350-7770, Fax: 410-643-9095 / 301-499-0933, Toll Free: 800-683-7770.

**Rebuilding
Together®**

**Thank you
for supporting
the 2010 WBC
Rebuilding Together
project on April 24.**

2010 Craftsmanship Awards

2010 Annual WBC Craftsmanship Awards

Local Building Industry Gathers to Recognize the Area's Top Craftsmen

More than 1,200 individuals from the DC area's building industry gathered to honor the area's most talented craftsmen and women at the Washington Building Congress' Annual Craftsmanship Awards Banquet at the Marriott Wardman Park Hotel on March 26, 2010.

"The first WBC Craftsmanship Awards Committee organized the inaugural awards program in the 1950's. Seven craftsmen were awarded certificates for their work on the 10-story Editors Building on H Street, NW," said Jonathan Kurtis, WBC's Chairman of the Board, giving the crowd some historical perspective to the evening's events. "The Craftsmanship Awards has grown to be one of the most prestigious events in our industry. As the awards program has elevated in prestige, the recognition of quality craftsmanship has continued to elevate in importance."

Each year up to five deserving craftsmen may be nominated by the WBC Craftsmanship Awards Committee and approved by the WBC Board of Directors to be inducted in the Craftsmen Hall of Fame. Selection of inductees is based on the number of awards an individual has received, the individual's time in industry, and other special factors that may be relevant. The night's 2010 Hall of Fame inductees were:

- **Robert B. Bodmer**
- **Albert "Buddy" McDowell, Jr.**
- **Ralph Eugene Pearson**
- **Kenneth Spohn**
- **Bill Suhrhoff**

"These individuals have proven over the course of their careers to be shining examples of what it takes to succeed in our industry," said Craftsmanship Awards Chairman Mike Shoemaker.

The Craftsmanship Awards Call for Entries went out to the entire membership and other related industry groups last September. WBC received a record 314 nominations in 10 trade

categories from sitework to finishes. With the participation and support of 178 judges, teams of evaluators went out in early January to evaluate all of the nominated projects. The evaluations were compiled, results tallied, and 78 winning entries were identified based upon the judges scoring. (A complete listing of the winning projects follows, and a complete list with project descriptions is available online at www.wbcnet.org.)

Very few companies had winning craftsmen on more than one or two projects, however craftsmen from J.E. Richards, Inc. were awarded for four projects; and those from Pierce Associates, Inc., David Allen Company and Mona Electric Group, Inc. were each awarded for three projects. Clark Construction Group, LLC was general contractor on 19 projects (including four as a Joint Venture partner with Balfour Beatty Construction); The Whiting-Turner Contracting Company was general contractor on nine projects; Balfour Beatty Company was general contractor on nine projects (including four as a Joint Venture partner with The Clark Construction Group, Inc.); and James G. Davis Construction Corporation was general contractor on eight projects.

Following selection of the Craftsmanship Award winners, a separate panel of Star Award judges representing different perspectives and disciplines within our industry was selected to independently evaluate the Star Award nominees. Eight outstanding entries were also recommended for Star Awards this year. From these, the Star Award winners for Visual Excellence, Technical Excellence and Excellence in the Face of Adversity were selected.

This year, the Star Award for Visual Excellence was awarded to the team of **Tony Barberly, Joel Cabanban, Wayne Libby, Roger Parker, Mike Pullen, and Wade Sampsell** with Gaithersburg Cabinetry and Millwork for their outstanding Architectural Millwork at **The Jefferson Hotel Renovation & Revitalization** project.

Joe Dugan, Joseph Lajoie, Eric Neville, Nick Noonan, and Russel Way, with Freestate Electrical Construction Company were honored with the Excellence in the Face of Adversity Star Award for their Power Generation, Distribution and Switchgear work at the **National Institutes of Health: CIT Building No. 12 Infrastructure Upgrade-Phase 1**.

Finally, the Star Award for Technical Excellence was presented to **John Butler, Doug DeGraw, and Ric Roberts**, with Icon EBS, and **Dean Beane, Nathan Bergen and Michael Marshall** with Structurecraft Builders for their Curtain Walls work at the **Arena Stage at the Mead Center for American Theater**.

2010 Craftsmanship Awards

Following are the names of all the Craftsmanship Award winners along with the projects on which they worked, their employers, and where applicable, the general contractors and other key project team members.

Star Award nominees are marked with a ★.

One block north of National Cathedral,
corner of Wisconsin Ave. and Macomb St.

WBC Craftsmanship Award Judging Experiences

My experience being a first time as craftsmanship award judge far exceeded my expectations. As a project manager working in the commercial switchgear department, my contribution to a project is only a small piece of the completed puzzle. I see the concept of the equipment mapped out riser diagrams and flip through factory drawings as I submit the equipment for approval. As a judge I had the opportunity to see this equipment in its intended installed working state. More importantly, I was able to actually appreciate the elaborate technical installation that these Electrical Craftsmen were able to accomplish.

An additional benefit of the day was the opportunity to cruise around town with a group of really well-respected and experienced electrical tradesmen. My group consisted of Larry Clark, Freestate Electric, Fred Marl, Dynalectric, and Jim Polk, Singleton Electric. We visited seven different jobsites and our judging categories ranged from Power Generation, Distribution, and Switchgear to Lighting Systems. As we toured the different electrical rooms my colleagues, who have lived the experience and participated in the coordination and installation on similar projects throughout their careers, mentored me through each site. Explaining the meticulous pipe and wire schematics, installation intricacies and challenges one would face; down to measuring pipe and arranging the couplings just right so that they would all align perfectly, as would every screw. I was able to bounce questions and ideas off these gentlemen, which ultimately enabled me to leave the experience truly respecting and appreciating the passion of those tradesmen who accept nothing less than exceptional quality.

—Sarah Slaughter
CAPITAL LIGHTING & SUPPLY

In my second year participating in judging for the WBC Craftsmanship Awards, it was just as much of a learning experience as the previous year, if not more. My team and I ventured to DC to judge the craftsmanship of seven different projects' doors and windows. We examined the quality and complexity of everything from whole building curtain walls to small-scale storefronts—all while sharing our knowledge of constructability standards, techniques, and design as well as our own experiences working with craftsman.

The industry knowledge one gains during this day is unique; colleagues come together from competing firms to discuss craftsmanship techniques and come away having learned or taught something new. The day is not only filled with learning experiences, but also of camaraderie. Having spent a full day sharing in this unparalleled experience—admiring some of the best craftsmanship in the region before many even know the building exists—provides a lasting experience to share with your teammates for a lifetime. At the end of the day, business cards are exchanged and new industry friends are made.

—Michelle Heim

give your project the energy it deserves.

From everyday maintenance and building renovations to green building construction, the high-powered contractors and electricians of NECA and IBEW Local 26 are the cost-effective, 24/7 solution when you need an electrical contractor in Washington, Maryland and Virginia. They're highly-trained, certified in the latest energy-saving technology and motivated to meet your budget and schedule. Find out more today at electricalalliance.org

THE ELECTRICAL ALLIANCE
National Electrical Contractors Association and Local 26 IBEW

200 Contractors and 8,000 Electricians **United for Quality.**

Member Projects

Old Dominion University's Community Development Corporation (ODU CDC) broke ground in March on **Hine/Turner JV's** housing development that will help revitalize the Lambert's Point neighborhood adjacent to the ODU campus and at the same time offer affordable housing to young families.

The 51-unit townhouse complex, called **43rd Street Norfolk**, features owner-occupied units for sale at prices that workforce families—in particular teachers—can afford. The development is intended to appeal primarily to Norfolk Public Schools teachers, so that they can live in an area close to their jobs, and it also is being marketed to other key members of the workforce, such as police officers, medical professionals and ODU employees.

Grunley Construction Company, Inc. announced that the **U.S. General Services Administration's (GSA) Mid-Atlantic Region**, headquartered in Philadelphia, PA, awarded the firm a \$23.8 million contract to renovate the exterior of the **U.S. Custom House**. The U.S. Custom House occupies an entire city block in the heart of Philadelphia's Historic District. Portions of the interior were renovated in the early 1990s. The 17-story facility houses numerous federal agencies, including the U.S. Customs Service, U.S. Department of Homeland Security, and U.S. Food & Drug Administration. All work will be performed while the facility remains occupied. Funding for the project was provided through the American Reinvestment and Recovery Act of 2009.

This is Grunley.

CAUSE MEANS EXCELLENCE

IN MECHANICAL CONSTRUCTION AND SERVICE

When you do business with one of the outstanding mechanical contractors who belong to CAUSE, you're dealing with a firm whose management and workers have made a binding, written commitment to excellence.

Twenty-five years ago, the **Mechanical Contractors Association of Metropolitan Washington**, together with **Plumbers Local 5** and **Steamfitters Local 602**, signed a pledge - to each other, their customers and the people of the national capital area:

No strikes or lockouts, the highest quality work, ethical bidding procedures, unmatched productivity through efficient work practices, safety first always, and a special commitment to the finest training of our workforce. CAUSE, the *Contractors and Unions Seal of Excellence*, was created to oversee the agreement.

In 2009, we wanted to celebrate a quarter century of keeping those pledges. And the best way we knew how was to renew all of them for another twenty-five years. **At least.**
